Sonu Sri Samyuktha

Software Engineering | Testing & Data Analytics

Phone Email LinkedIn GitHub

Summary

Software engineering-focused candidate with strong foundations in Python, Java, SQL, testing, and data analysis. Hands-on experience in web application testing, REST API validation, automation, and exploratory data analysis.

Skills

Programming & Databases: Python, Java, SQL, MySQL, MongoDB
Software Testing: Manual Testing, Functional Testing, Regression Testing, Smoke Testing, API Testing, Defect Documentation, SDLC,Agile
Automation & Tools: Selenium, TestNG, Postman, Maven, Git, GitHub, VS Code, Eclipse
Data & Analytics:EDA, Data Validation, Tableau, Power BI
Web Technologies: HTML5, CSS3, JavaScript, Tailwind CSS, Vite, Netlify

Projects

E-Commerce Web Application Test Automation | ***Selenium WebDriver, Java, TestNG, Maven, Git/GitHub***

- Automated functional test cases for the TutorialsNinja e-commerce application using Selenium WebDriver and TestNG, covering account registration with valid and invalid inputs.
- Implemented assertions for page navigation, account creation, success messages, validation warnings, and expected UI elements across positive and negative scenarios.
- Organized tests using a Maven-based structure with reusable base/utilities and maintained test-case documentation in Excel.

REST API Testing | ***Postman, JavaScript***

- Tested REST API endpoints for book retrieval, client registration, and order management using Postman.
- Validated HTTP status codes, response payloads, headers, parameters, and authentication across positive and negative scenarios.
- Created Postman collections with JavaScript assertions to verify expected API behavior.

CursorGaze – Eye Controlled Mouse System | ***OpenCV, MediaPipe, PyAutoGUI***

- Developed an eye-controlled cursor system using MediaPipe facial landmarks and OpenCV for real-time navigation.
- Implemented blink-based click detection using eyelid-distance thresholds with minimal false triggers.
- Designed an accessibility solution enabling hands-free computer control.

Experience

Front End Web Development Intern **August 2025 – September 2025**
AICTE × Edunet Foundation (Virtual) *Tools Used: HTML5, Tailwind CSS, JavaScript*

- Developed a responsive portfolio website with 5+ sections, including dark/light mode and dynamic content.
- Deployed the portfolio on Netlify and optimized performance for fast loading and reliable hosting.

Data Analytics Intern **September 2025 – October 2025**
AICTE × VOIS for Tech (Virtual) *Tools Used: Python, Pandas, NumPy, Matplotlib, Seaborn, Plotly*

- Performed EDA on 8,000+ Netflix records and built visualizations revealing genre trends and production peaks.
- Cleaned datasets by resolving missing values and inconsistencies across approximately 15% of records.

Leadership, Activities & Achievements

- **AICTE Activity Coordinator (ISE Dept):** Scheduled departmental activities, coordinated participation, and designed digital posters for events and rallies.
- **Food Fest Coordinator:** Managed department stall operations including menu planning, budgeting, promotion, and stall design.
- **NPTEL:** Scored 94% and ranked among the Top 5% of candidates.

Education

B.E. Information Science & Engineering **2023–2027**
Vemana Institute of Technology, Bangalore *CGPA: 8.8 / 10*
